

MARTÍN ALEJANDRO CONTRERAS

IT Generalist & Systems Administrator · Infrastructure, Platforms & Applied AI · Full Career

Buenos Aires, Argentina | martinAlejandroContreras@outlook.es | [linkedin.com/in/martinalejandrocontreras](https://www.linkedin.com/in/martinalejandrocontreras)

PROFESSIONAL SUMMARY

10 years in technology (6+ in companies): from component-level PC hardware repair (self-taught beginnings, UTN course, and BitFix, 50+ clients) to enterprise platform administration and change-control authority under strict banking compliance (GIRE S.A., DUCIT, POWERSIS; Red Hat OpenShift, RHEL 9, SAP S/4HANA, Active Directory, and HPE LTO-7 tape backups). Today, I also design and build software systems with applied AI under strict rule-scaffolding and testing.

Versatile technical profile with proven ability to lead and deliver end-to-end technology: servers, segmented Cisco networking, advanced workstation support, offline-first software deployments, and clear communication with vendors and management. Teaching background as a high school computer science teacher and Junior Achievement mentor.

Languages: Spanish native; English: written fluent / spoken functional (daily technical use with international vendor support).

WORK EXPERIENCE

Gaucha Agro — AI-Assisted Systems Development

2026 – Present

Own Product · Poultry Farm Management Software · AI-Directed Engineering

- **Multi-role poultry management:** end-to-end system for laying-hen farms (Admin, Supervisor, Field Operator). Daily egg, mortality and feed logging, alerts on INTA parameters, and SENASA DT-e data.
- **Offline architecture & installer:** runs on local farm PC without internet, syncing mobile phones over local WiFi. Self-contained Windows installer (Inno Setup) embedding Python and portable PostgreSQL.
- **AI direction & rule scaffolding:** code is written by AI (Claude Code, Gemini) under strict rules: task-reinjection hooks, custom skills, versioned memory files, and 500+ automated tests as the quality gate.

Platforms & Infrastructure Analyst

Apr 2025 – Mar 2026

GIRE S.A. · Buenos Aires · DUCIT–GIRE Group · Banking Compliance

- **OpenShift & banking APIs:** YAML operations (monitoring, user access, and group permissions) on a two-administrator team. Critical API support for Rapipago and client banks (Santander Río, ICBC, Patagonia), handling major incidents.
- **BO 4.3 deployment on RHEL 9:** installed backend and frontend across 3 environments on VMware, entirely via console on a restricted network. Coordinated ~20 firewall rules, Active Directory integration, and TLS certificates.
- **HPE tape library (LTO-7):** physical server mounting, cabling, and connection to HPE tape library under banking compliance, managing production sign-off. Diagnosed APS node saturation in production.

SAP Basis Analyst

May 2024 – Nov 2025

GIRE S.A. · SAP S/4HANA (MM & TM) · 200+ users · DEV / QAS / PRD

- **Change control & authorizations:** final sign-off gate before production billing environment: validation of integration, parent/child roles (PFCG, SU01/10, SUIM, ST01) and transports (STMS).
- **Privileged access & SAP support:** authorized and audited SSH credentials for international SAP support during scheduled windows. Notes/patching (SPAM/SNOTE) and HANA on-call (ST22, SM21).

IT Business Support Specialist

Feb 2022 – May 2024

GIRE S.A. · Buenos Aires

- **Active Directory & Jira support:** user lifecycle, groups, permissions, and enterprise GPOs. Advanced hardware diagnosis, troubleshooting, and component-level board repairs.

Infrastructure & MDM Analyst — On-site

Feb 2021 – Mar 2022

DUCIT · Armored Cash-in-Transit Operations · DUCIT–GIRE Group · ~150 staff

- **Sole on-site technician:** end-to-end resolution of the building's IT (offices, crews, and armored fleet). Manager's right hand on-site and primary technical contact for external vendors.
- **Mobile MDM fleet (140 devices):** configuration of Zebra terminals, GPS tablets, and crew phones with kiosk policies, certificates, and custom Android images. Redesigned update cycle, eliminating on-site standby windows.
- **AD domain, key board & tape forensics:** participated in full AD redesign after 8 years of technical debt. Detected third-party API flaws on electronic key board integrated with SAP. Forensic video recovery from tapes for security audits.

Field IT & Systems Technician

Jun 2019 – Feb 2021

POWERSIS · Clients: ICBC, Santander Río, Cencosud

- **Ransomware incident response:** isolation, assessment, and recovery of ~300 endpoints at a large retail client. Server hardware migration and branch equipment installation across bank branches.

PC Hardware & Systems Repair Technician

Feb 2016 – Feb 2019

BitFix / Black Dragon (Personal Venture) · Self-Taught Beginnings + UTN Course

- **Computer repair service (50+ clients):** self-taught PC repair formalized with the UTN PC Assembly & Repair certification. Component-level replacement, hot-air soldering, motherboard diagnostics, power supply repair, data recovery, and rescue boot environments.

TECHNICAL SKILLS

INFRASTRUCTURE, SERVERS & VIRTUALIZATION

RHEL 9 / Linux, Windows Server, Red Hat OpenShift (YAML), VMware, HPE tape libraries (LTO-7 cartridges), Active Directory (domain migration, GPOs), ManageEngine MDM (140 Zebra/Android devices), Data Center (iLO/iDRAC)

ENTERPRISE PLATFORMS & ACCESS

SAP S/4HANA Basis (STMS, PFCG, SU01, SUIM, ST01, SPAM/SNOTE, SM36/SM37, HANA on-call), SAP BusinessObjects 4.3 (console install on RHEL 9, CMC, Tomcat/Java, APS node architecture), APIs on IBM API Gateway, Jira Service Management

NETWORKING, CONNECTIVITY & SECURITY

Segmented networks with VLANs (802.1Q), ACLs, NAT, per-VLAN DHCP, Cisco routers & switches (1841, Catalyst 2960), WiFi/AP, Pi-hole DNS, Cloudflare Tunnels, firewall rules, F5 load balancing, TLS certificates, ransomware response

HARDWARE, REPAIR WORKSHOP & ELECTRONICS

Component-level diagnostics, soldering and hot-air desoldering, power supply repair, hard drive recovery, rescue environments (Hiren's Boot), Arduino and ESP32 microcontroller prototyping

AUTOMATION, APPLIED AI & SOFTWARE

AI direction (Claude Code, Gemini, DeepSeek), context engineering, hooks, custom skills, MCP tools, Python, FastAPI, React, PostgreSQL, self-contained Windows installers (Inno Setup), 500+ automated tests, Git, GitHub

TEACHING, LEADERSHIP & EDUCATION

High school computer science teacher (DGCyE, 20 students), Junior Achievement Argentina mentor. Fluent written / functional spoken English. Information Technology Management coursework (UADE, 2022–2023). Google IT Support Certificate. SAP TADM10/12

EDUCATION

Information Technology Management — B.S. program (coursework)

2022 – 2023

Universidad Argentina de la Empresa (UADE) · Buenos Aires

CERTIFICATIONS & TRAINING

- SAP TADM10 — Training (Buffa Sistemas, 2024)
- SAP TADM12 — Training (Buffa Sistemas, 2024)
- Google IT Support Professional Certificate · IT Infrastructure Systems & Services Administration
